Part B for Aug. 1926

SUBJECT

Reorganisation of the Public Works Department.

To

The Secretary to Govt. P.W. Dept
" Comptroller Chief Accounts
" Chief Engineer in Mysore
" Special Officer, R.R.S. Works
" Heads of Departments
" Secretaries to Govt.
" Chief Electrical Engineer

No. 358-409 Dt 28/7/26

Orders certain arrangements for the conduct of the Secretarial function of the Public Works Dept. & approves of the proposal to revive one Superintending Circle in the P.W. Dept.

N O T E.

On account of financial stringency the grants for the Public Works Department since 1919 were reduced and consequently the percentage of establishment charges which should not have been normally more than 23 per cent went up to as high as 27 to 28 per cent. As there were no immediate chances of grants for Public Works Department being increased the questio of reduction of establishment had to be seriously considered and the then First Member of Council in consultation with the Secretary, Public Works Department, formulated certain proposals affecting the reduction and re-organisation of establishment generally. The important proposals were-

The offices of the Superintending Engineers and also the post of the Deputy Chief Engineer were abolished and the work of the Department was divided into two independent sections, namely, Roads and Buildings and Irrigation. These proposals were considered by the Finance Committee and Government finally passed orders in September 1922 according to which two separate administrative offices (1) Office of the Chief Engineer for Irrigation and Secretary to Government (2) Office of the Chief Engineer for Roads and Buildings and Secretary to Government were constituted at an estimated cost of Rs 6,332 per month.

This came into force from 1st January 1923 and immediately a year after, ~~year~~, the retirement of Mr.H.D.Rice the then Chief Engineer, Roads and Buildings was taken advantage of and the administrative offices

Secy P.W.D

I am in general agreement with the views of the Chief Engineer on approval of his proposals. I am however, inclined to think that the Circle Establishment for the Supdg Engineer's office is capable of reduction. Further action may kindly be taken on this note.

JM
10.6.26

14.6.26

were again re-organised. The two sections were again combined into one and the Chief Engineer was divested of the Secretariat functions solely with the object of facilitating his free movements in the Districts for supervision of works. The pay of the Secretary who was also the Special Officer of Krishnaraja Sagara Works, was charged entirely to the capital work, showing further reduction of establishment charges in the Public Works Department. Thus the retrenchments have been effected to such a drastic extent that any proposal and the slightest improvement in the organisation will mean additional cost.

The combination of two offices of Roads and Buildings, and Irrigation; and the dealing with the Executive Engineers of twelve Divisions, has thrown a very heavy amount of work on the Central Office; and it has not been possible to devote due attention to the larger problems affecting public works. The object of Government in divesting the Chief Engineer of his Secretarial functions, has not been realised in actual practice and it has in no way lessened the routine work of the Chief Engineer. On the other hand, for various reasons, the correspondence has actually increased.

Now that it has become necessary to have a full time Chief Engineer for Krishnaraja Sagara Works as it is proposed to take up the High Level Channel works, it is necessary to reconsider the organisation of the administrative sections of the Public Works Department. In my opinion the Chief Engineer has to be relieved of routine work so that he might be able to devote greater

attention to more important Public Works Department problems as in former years. Further in order that local officers may get necessary training and experience to be able to conduct high administrative office the intermediate office of the Superintending Engineer between an Executive Engineer and Chief Engineer is essential. I attach much importance to this aspect as I believe there is a feeling that our Senior Executive Engineers who have put in about 20 years of service are not sufficiently experienced to be appointed as Heads of Departments.

I enclose, herewith, a comparative statement showing the cost of establishment of the Public Works Department administrative offices as obtained in 1922, and 1923 and what it would be if two Circles of Superintendence are constituted or as an alternative only one such office is sanctioned. The additional cost involved will be Rs 39,153 in one case and Rs 17,844 in another case. If it is felt that additional cost will be involved by the establishment of two Circles, only one circle of Superintendence may, for the present, be constituted with its headquarters at Shimoga. The extra cost of Rs 17844/- may still further be reduced to Rs 13198/- by removing the Executive Engineer now attached to the Chief Engineer's office and replacing him by an Assistant Engineer. The new circle may comprise the Districts of Hassan, Kadur, Shimoga, Chitaldrug and the Bhadra Anicut Range works. The other Divisions, viz., the Bangalore, Mysore, and Kolar and Tumkur together with the Water Supply Division, the Water Supply construction and the Special Divisions will

continue to be under the direct control of the Chief Engineer until such time as it is possible to have another circle of superintendence at Bangalore or Mysore.

The Chief Engineer may also be appointed Secretary to Government in his own Department so that he may be the only link between the Department on one side and the Government on the other. The proposals embodied in the comparative statement are based upon above recommendations.

The total cost of establishment according to the proposed changes will roughly work out Rs 8,60,000 for the whole Department. The Budget grant under State Fund works alone may be taken at Rs 20 lakhs for 1926-27 and including other Funds, it will not be anything less than 33 lakhs. The percentage of establishment will then be 26.0 the same as it is now. But on the other hand, the efficiency of the Department will be much improved.

Sanction of Government may therefore be accorded -

(1) to the Chief Engineer being also made Ex-officio Secretary to Government in the P.W.D.

(2) the constitution of a Circle of Superintendence for the Northern Divisions with heads at Shimoga; and

(3) the establishment proposed for the two administrative offices as set forth in the comparative statement attached.

Returned, with compliments-

2. The work in the combined office will be ------- important and may be roughly classified under the ---- following heads:-

(1) Secretariat work.

(2) Administrative work.

Disposal of the routine work of the Department, involved in the correspondence of the Superintending -- Engineer and Executive Engineers including Establishment Section.

(3) (a). Technical work in the Chief Engineer's --- Office. Scrutiny of large projects, prompt disposal of revised estimates, so as not to hamper the progress on works, for lack of final orders on the estimates, etc.

(b) Special investigation of schemes, such as, the proposals in connection with the water supply of -- Bangalore now under consideration and other schemes --- ordered by Government from time to time, such as, the Anjanapur project, Tumbadi project, bridge designs, --- etc. These require initiative being taken in the ---- Chief Engineer's Office, to expedite prompt disposal -- from the Executive Engineers.

(c) Pursuing questions ordered by the Chief ---- Engineer during inspections of works with a view to -- see to the quick disposal of orders issued.

(4). Accounts Work.- Consisting in watching over

WD 2468—GPB—2,000 copies 20-6-24

and passing orders on the monthly objectionable --- items of the Division accounts, and on the - - - -- Comptroller's inspection notes on the annual ------ accounts of Executive Engineers' offices, as per -- recent orders of Government in the Finance Department. This work does not receive adequate attention from the Executive Engineers, as a result the objectionable items statements are increasing in -- volume involving heavy correspondence. This ----- demands, special attention to keep the accounts --- side of the department in a satisfactory order-

(5). Miscellaneous work.- Such as, consideration of questions to be placed before the Committee for P.W.D. and Railways, subjects of the Representative Assembly and Legislative Council, petitions, ------ special reports called for by Government, etc.

(6). Architectural work.- (Temporary Section). It is considered desirable to allot specific work - to this section so as to get definite progress of - work in this direction. From the experience of -- past two years, it is found that if routine office work is also saddled on this section, both the ---- routine and project work suffer, especially as the officer has to go out for inspection now and then. The work in this section will be the preparation of architectural project and designs for new buildings in consultation with the Palace, University, ------ Education, Medical, Revenue and Krishnarajasagara - Departments and of architectural details for all -- big buildings and bridge work in progress like the New Mansions, Canopy, High Schools, etc. Copies - of the sanctioned drawings of all such works should

be in the Chief Engineer's Office and the architectural details got prepared in the Chief Engineer's Office --- alone and forwarded to the Executive Engineers for ---- execution without waiting for requisition from them. As the New Mansion and Canopy and Krishnarajasagara --- parapet designs have to be completed early, there will be -- enough work for this section for a year. or two

(7). For the satisfactory conduct of works under -- paras 1 to 5 above, I am of opinion that at least two experienced Assistant Engineers are necessary in the - Chief Engineer's Office as already sanctioned by ----- Government-

It may be mentioned here that in Mr. Cadambi's time, there were in the Chief Engineer's Office a ---- Deputy Chief Engineer, an Assistant Secretary and one technical assistant and one special assistant for the same work in addition to two Circles of Superintendenc and one Architectural Division. I may also point out that the Chief Electrical Engineer has got five ------ officers in his office, viz., Assistant Chief Electric -al Engineer, Technical Assistant, Financial Assistant Accountants Assistant and Research ~~Staff~~ Asstt. It will -- therefore be seen that two Assistant Engineers are --- absolutely necessary for the Chief Engineer's Office, especially as there will be only one Circle of ------- Superintendence under him.

(8). As regards the architectural work, it may be -

WD 2468—GPB—2,000 copies 20-6-24

stated here that it is very desirable to permit --- Mr.S.H.Lakshminarasappa to devote exclusive attention to this work without being hampered with ----- routine office work for which also he does not seem to have a liking. As he is specially trained in - architecture, it seems also desirable to utilise -- his services in that direction only. In Bombay -- and Madras Public Works Departments also, the ----- Architectural Department is kept separate. As -- proposed by me the section may be treated as ------ temporary and as the work will be done under the -- supervision and orders of the Chief Engineer, half the cost of the Executive Engineer may be charged - to the Chief Engineer's Office, and half debited to the works for which he prepares projects. The ---- latter is an accepted principle since architects -- fees, etc., are generally provided for in the ----- estimate for works.

(9). As regards the Dewan's remarks regarding -- the number of Draftsmen and peons in the Superintending Engineer's Office, it may be stated that the -- establishment now proposed is the same as was ----- previously sanctioned for the Superintending ------ Engineer's Offices (less one clerk). I do not think that it is in - any way heavy and as the Superintending Engineer is to be given full powers of disposal, I consider it desirable to give enough establishment.

(10). According to the above recommendation, the permanent extra cost per year comes to Rs. 13,207 only, while the temporary addition on account of the ----- architectural section comes to Rs. 4883. The --- (Col VII of the statement)

Serial No.

necessity or otherwise of continuing the temporary --
Architectural Section may be considered 2 years after

(11). Sanction of Government may kindly be -------
communicated to the proposals early.

Financial Secy Work Accts

21.6.26

Serial No

The organisation of the Directing staff of the Public Works Department has had several vicisitudes. The offices of the Superintending Engineers have been constituted and abolished more than once. The Special Finance Committee very strongly recommended the abolition of these offices in 1922 and they have ceased to exist since then.

The proposals of the Public Works Secretary including the revival of the office of the Superintending Engineer, entail an additional expenditure of Rs.13,207 permanent with Rs.4,883 temporary, if the architect be continued as a whole time officer. There is no provision for this extra expenditure in the next year's budget nor is there a margin in it, to meet the additional recurring items without reducing works outlay and enhancing the per centage of cost of establishment which is already high.

The next year's P.W.Budget includes a special grant of Rs.4.20 lakhs on account of the capital works towards the improvement of the Mysore and Bangalore water systems, which is met from the Special Non-recurring reserve and as this reserve would be practically exhausted by the end of 1926-27, this resource will no be available in future.

To what extent savings in permanent exrenditure can be effected by the abolition of the Special Engineer's establishment under the Education and Military departments (vide para 3 of the P.W.Secretary's note) when the work of these departments is taken over by the P.W.Department is not stated.

Serial No

A provision of Rs.20,000 is made for Tank Survey under "Restoration of Minor Tanks" and if the temporary Division be abolished, it does not appear to be appropriate to count on this savings for the purpose of increasing expenditure. Unless the annual revenues afford sufficient margin for enhancing the grant for works outlay, it is undesirable to increase the cost of permanent establishment to the extent proposed.

In view however of the contemplated programme of development of Irrigation Works a readjustment of the P.W.Department establishment entailing some additional expenditure cannot perhaps be resisted.

I would venture to ~~suggest~~ offer the following suggestions for reducing cost:-

There is no sufficient financial justification for having a separate Assistant Engineer for routine work at Headquarters, with a view to enable on personal grounds the present Executive Engineer to devote exclusive attention to architectural work.

Either the proposal regarding the Architect may be ~~dropped~~ deputed or the extra post of Assistant Engineer may be cut out, if the architect should continue to work in the Chief Engineer's office.

The work of the Gorur bridge is stated to be in full swing and an additional grant of Rs.20,000 is given during the current year. As the work is likely to be completed soon, the temporary sub division formed for the purpose which is costing Rs.2,436 may be abolished

Whether it is not possible to reduce any of the existing divisional charges e.g.the Bhadra anicut or one

Serial No

of the two channelx divisions may also be examined by the Public Irosk Department.

20.6.16.

Returned, with compliments, to the Secretary to Government, Public Works -- Department-

2. The Financial Secretary is ------ practically convinced of the necessity - for the re-adjustment of the P. W. D. Establishment in view of the contemplat--ed programme of development of irrigation works, etc., though he demurs to -- the increase of permanent establishment to the extent proposed-

3. In this connection, it may be --- stated that the abolition of the special establishment under Education and ------ Military is likely to result in a ------ saving of R$10,500 per year. This will reduce the net extra cost of the - - - - present proposal to R$3,000 per year ---- permanently and R$8,000 ~~nearly~~ temporarily so long as the Architectural Section is retained-

4. As regards the other suggestions for reducing cost mentioned by the ----- Financial Secretary, it may be stated -- that it will not be possible to reduce - the existing establishment of the - - - Department which has already suffered to the utmost possible extent-

5. The Executive Engineer (Architectural Section) with his duties in connection with designs of large buildings, -- working drawings of works in progress, -

standard designs of Medical and other -- buildings will have his hands quite full and the addition of the work of the ---- office to him will result in justice to neither the onemor the other. The ---- Assistant Engineer is therefore quite -- necessary to assist the Chief Engineer - for satisfactory disposal of the many -- important items of work as already ----- stated in detail in my note dated 16th June 1926 to which kind reference is --- invited-

6. The Gorur Bridge work is formed - as a temporary measure and the establish- ment is charged to works. Even if it - be abolished the present establish- ment charges will not get reduced. How- ever, the work is expected to be closed in the course of a year when the - -.- - establishment attached to it will be --- done away with-

7. As regards Bhadra Anicut and ---- Channels, Government desire that the --- entire work should be completed in as -- short a time as possible and it is not - desirable for this short period to ----- interfere with the existing arrangement. In fact it is only a Sub-Division ------ consisting of 2 clerks and a Draftsman - and as separate accounts are to be sent up to the Comptroller an Accountant is - also given-

8. With regard to the reduction of one of the two Channels Divisions, the - suggestion does not seem practicable as a single Division cannot manage all the Channels the total length of which is -- more than 700 miles. There are still a large number of new works to be taken up as additional area has to be brought --- under cultivation as per recent agree- ment between the Madras and the Mysore - Governments and the Special Officer has made out that such an arrangement is --- impossible-

9. Lastly, with regard to the ------ suggestion of the P.W.Secretary for the abolition of the Tank Survey Division, I beg to state that it is desirable to - have a definite programme of irrigation works laid down and carried out as ----- expeditiously as possible and therefore the work.done so far by the Tank Survey Division will be continued by the ------ Executive Engineers of the two Districts. The Division may be abolished after the Circle is constituted-

10. It may thus be seen that further reduction is not possible and as the --- additional cost involved is small as --- stated in paragraph 3 above, sanction of Government may kindly be obtained early to the proposals-

20.6.26

CHIEF ENGINEER OF MYSORE.

CONFIDENTIAL.

No. D-1678

Resubmitted to the Dewan of Mysore, with reference to his orders dated 21st June 1926-

2. The Financial Secretary's remarks and the Chief Engineer's reply thereto - are enclosed. I have already explained in a note to Government through the ---- Financial Secretary that it is not ----- possible to abolish one of the Channel - Divisions. A copy of the note is ----- enclosed for information. The Chief -- Engineer is agreeable to take up the --- P.W.D. work now entrusted to the Education and the Military Departments without extra establishment. The small - - - - increase of about Rs.8,000 has to be found either from savings under establishment or provided by a supplemental grant if - found necessary later on-

3. The file will, if approved, be -- forwarded to the Chief Secretary to ---- Government for being placed before the - Council-

Put D. SW

9/7/26

Please note

*9. (*a*) If the views expressed by the Financial Secretary in any case, whether original or un-officially referred, are not accepted by the Member of Government in charge, or by the Dewan and Members of Council, as the case may be, the file containing the discussions shall be sent to the Financial Secretary a second time, in order to enable him, in cases in which he considers that the orders proposed to be issued are opposed to financial rules of Government or to recognised financial principles or for other reasons of a financial nature, are open to objection, to record a respectful representation to that effect, which will be placed by the Dewan before His Highness the Maharaja for consideration.

(*b*) All cases sent to the Financial Secretary under this rule should be treated as immediate and returned to the Department concerned within three days of receipt.

Submitted to His Highness.

Owing to the necessity for starting the construction of the High Level Channel in connection with the Krishnaraja Sagara Works and undertaking other developments on a large scale, it is found necessary to have a full-time Chief Engineer for the Krishnaraja Sagara Works and it will no longer be possible for a single officer, Mr.K.R.Seshachar, to undertake these duties in addition to those of the Secretary, Public Works Department. With a view to relieving Mr. Seshachar of the duties of Secretary, Public Works Department, so as to enable him to devote his entire attention to the works connected with the Krishnaraja Sagara, I requested the Chief Engineer to submit a note for consideration as to how he may be relieved of the duties of the Secretary, Public Works Department and how at the same time we may be able to make some more effective arrangements for better supervision of the works in the districts. He has proposed the revival of the appointment of Superintending Engineers and creating 2 Circles of Superintendence. If this staff is considered too costly he suggests that one circle may be immediately formed with Head Quarters at Shimoga. By the revival of this office the Chief Engineer will be relieved of some of his inspection work and thus be able to take up the duties also of the Secretary, Public Works Departments.

2. The additional cost involved in having 2 Superintending Engineers is stated to be Rs.39,153, while if there is only a single one the cost will be Rs.17,844. At present there is an Executive Engineer attached to the Chief Engineer's Office. The cost may thus be reduced by removing the Executive Engineer now attached to the Chief Engineer's Office and replacing him by an Assistant Engineer.

3. To begin with it is proposed to have only a single -

Superintending Engineer. The new circle may be comprised of the districts of Hassan, Kadur, Shimoga, Chitaldrug and the Bhadra Anicut Range Works. The other Divisions, viz., the Bangalore, Mysore, Kolar and Tumkur Districts, to-gether with the Water Supply Division, the Water Supply Construction and the Special Divisions will continue to be under the direct control of the Chief Engineer until such time as it is possible to have another circle of superintendence at Bangalore or Mysore.

4. The Financial Secretary who was consulted, points out that there is further scope for reduction not only by the abolition of the appointment of the special Executive Engineer now attached to the Chief Engineer's Office for architectural work, but also by the abolition of the temporary Sub-Division for the Gârur bridge which has been sanctioned at a cost of Rs.2436.

At present a special establishment is maintained in the Education and Military Departments for construction of buildings and other works pertaining to these departments. These establishments cost nearly Rs.10,500. If this work is re-transferred to the Public Works Department, there will be a saving of this amount. It will thus be seen that the proposals to appoint an additional Superintending Engineer can be given effect to without much extra cost by carrying out the reductions proposed by the Chief Engineer and the Financial Secretary and the savings in the Education and Military Departments.

The matter was considered in Council who have resolved as follows:-

> "The proposals contained in para 4 of the Public Works Secretary's Note dated the 20th June 1926 may be approved. The Tank Survey Division may be abolished. The work now entrusted to the Education, Military and Police Departments will be attended to hereafter by the Public Works Department".

The question of what further reduction can be made in the Chief Engineer's Office and what further arrangement for attending to architectural work will be examined and every

The figures in the draft are verified - Vide Notes of Verification - It will be seen therefrom that the savings anticipated and taken into account in the G.O. by the abolition of the special establishments in the Education & Hily Deptts and of the Bank Survey Division are less than the provision made in the current years budget. The chief Engineer apparently expects that some portions of these establishments will have to be retained and provided for under the revised arrangement - In any case it should be possible, I think, to meet the extra cost of Rs 4844 during the current year by reappropriation in the P. W Deptt or by further reductions if necessary in the grants for the special establishments above referred to -

As according to the G.O. transfers of grants from one major head to another are involved to meet the extra cost during the current year, it is necessary that a Supplementary Vote should be obtained from the L. C. to explain the procedure. I have suggested some Verbal alterations in the draft.

NOTE—Contn. Sheet

D. O. No.

MYSORE PUBLIC WORKS DEPARTMENT
CENTRAL OFFICE,

Dated Bangalore the, 20th July *192* 6.

Dear Mr. Venkatesa Iyengar,

With reference to your D.O. Letter of even date, I write to inform you that the cost of the Tank Survey Establishment is Rs.20,000/- for six months, the ---- Division itself having been sanctioned for six months only from 15th April 1926.

The Executive Engineer has been transferred to the Mysore Iron Works and the Sub Divisions at Kolar and Tumkur have been attached with their respective establishments to the Kolar and Tumkur Divisions. On account of the transfer of the Executive Engineer, the cost will reduce itself by about Rs.2,500/-.

As far as I am aware, there is no particular --- establishment attached to the Police Department for carrying out the works.

Yours sincerely,

M. Narasimha

Clean file draft

Proceedings of the Government of His Highness the Maharaja of Mysore

---

Read again:

Government order No.2534-85/C.B.157-23-1 dated the 4th February 1924, sanctioning certain administrative changes in the Public Works and Electrical Departments.

2. Note by the Chief Engineer on the subject of the Secretariat duties in connection with the Department of Public Works.

Order No. 358-409/C.B.19-6-1

Dated Bangalore 28th July 1926.

In the Government order read above Government sanctioned the combination of the Irrigation Branch and the Roads and Buildings Branch of the Public Works Department, which till then were under separate officers, into one charge and placed the whole work under one Chief Engineer. This Officer was given purely administrative work and the Secretariat functions of the P.W.Department together with those of the Electrical Department were assigned to a separate officer viz. Mr.K.R.Seshachar, who is in addition Special Officer, Krishnarajasagara Works. Owing, however, to the necessity for starting the construction of the High Level Channel and on account of other developments on a large scale in connection

with the Krishnaraja Sagara Works it is found necessary to have a full time Chief Engineer for the Krishnaraja Sagara Works. As Mr.K.R. Seshachar will, therefore, be unable hereafter to attend to Secretariat work of the Public Works Department, the Chief Engineer was requested to submit proposals for a re-allocation of the administrative and Secretariat work of the Department. That Officer has proposed the revival of the two circles of Superintending Engineers which were abolished in 1922, one officer at least being appointed for the present and placed in charge of the four districts of Hassan, Kadur, Shimoga and Chitaldurg, so as to relieve the Chief Engineer of part of his inspection work and enable him to take up the duties of the Secretary to Government in the Public Works Department. It has also been proposed in this connection that the Tank Survey Division may be abolished and the work transferred to the regular P.W.D. Public Work Divisions. Establishment as in the appended list has been proposed for the two administrative offices, Viz. that of the Chief Engineer and the Superintending Engineer.

Government approve of the proposal to revive one Superintending Circle in the Public Works Department in order that the Secretariat functions of the department may be transferred to the Chief Engineer. The Superintending Engineer will be in charge of the four districts mentioned above with head-quarters at Shimoga and the Chief Engineer in direct charge of the other four districts and

the Special Divisions as heretofore. He will also be Secretary to Government in the Department. The establishment proposed for the Offices is sanctioned. Mr.K.R.Seshachar, Special Officer, Krishnaraja Sagara Works, will continue as Secretary to Government for the Works and in the Electrical Department. These arrangements will come into effect from 1st August 1926.

The Tank Survey Division will be abolished as proposed. ~~Government observe that at present there is some~~ Orders have already issued abolishing separately the special establishment now employed in the departments of Education and Military to carry out the building and other works of those departments. ~~These special establishments will also be abolished and~~ the work ~~now~~ carried out by them will hereafter be attended to ~~hereafter~~ by the Public Works Department. The extra cost of the new Circle of Superintendence of the Engineering Department which is estimated at Rs. ~~17,844~~ 18090 will thus be reduced, the net financial result of the arrangements now sanctioned being as in the statement in the margin. Necessary action according to these orders may be taken immediately.

Extra cost of revised Establishment Rs. ~~17,844~~ 18090

Savings by abolition
(1) of estts.in End. & Mily.Deptts. Rs. ~~10,500~~/ ~~11572~~ 11572
(2) of Tank Survey Dn (in 1926-27) Rs.2,500.

Net extra expenditure in 1926-27 Rs. ~~4,844~~ 4018
In future years. ~~7,344~~ 6518

4. The Chief Engineer is requested to point out a source for meeting the net extra cost of Rs. ~~4,844~~ 4018 during the current year and to investigate what further reductions of establishment can be effected in his office, and whether the existing arrangements for attending to architectural work can be modified so as to reduce expenditure and submit proposals early for orders of Government.

5. As according to the revised arrangements sanctioned in this order transfer of grant from one Major head to another during the current year is involved, a supplementary schedule of demand should be placed before the Legislative Council for voting at the next session an extra grant to the Civil Works budget.

GENERAL AND REVENUE DEPARTMENTS

G. O. No. 358-409/C. B. 19-26-1 Dated, Bangalore, 28th July 1926

Secretariat work of the Public Works Department

Orders certain revised arrangements for the conduct of----

Read again:-

Government Order No.2534-85/C.B.157-23-1 dated the 4th February 1924, sanctioning certain administrative changes in the Public Works and Electrical Departments.

2. Note by the Chief Engineer on the subject of the Secretariat duties in connection with the Department of Public Works.

ORDER NO.358-409/C.B.19-26-1 DATED 28TH JULY 1926.

In the Government Order read above Government sanctioned the combination of the Irrigation Branch and the Roads and Buildings Branch of the Public Works Department, which till then were under separate officers, into one charge and placed the whole work under one Chief Engineer. This officer was given purely administrative work and the Secretariat functions of the Public Works Department together with those of the Electrical Department were assigned to a separate officer, viz., Mr.K.R.Seshachar, who is in addition Special Officer, Krishnarajasagara Works. Owing, however, to the necessity for starting the construction of the High Level Channel and on account of other developments on a large scale in connection with the Krishnaraja Sagara Works it is found necessary to have a full time Chief Engineer for the Krishnaraja Sagara Works. As Mr.K.R. Seshachar will, therefore, be unable hereafter to attend to Secretariat work of the Public Works Department, the Chief Engineer was requested to submit proposals for a re-allocation of the administrative and Secretariat work of the Department. That Officer has proposed the revival of the two circles of Superintending Engineers which were abolished in 1922, one officer at least being appointed for the present and placed in charge of the four districts of Hassan, Kadur, Shimoga and Chitaldrug, so as to relieve the Chief Engineer of part of his inspection work and enable him to take up the duties of the Secretary to Government in the Public Works Department. It has also been proposed in this connection that the Tank Survey Division may be abolished and the work transferred to the regular Public Work Divisions. Establishment as in the appended list has been proposed for the two administrative offices, viz., that of the Chief Engineer and the Superintending Engineer.

Government approve of the proposal to revive one Superintendence Circle in the Public Works Department in order that the Secretariat functions of the department may be transferred

to the Chief Engineer. The Superintending Engineer will be in charge of the four districts mentioned above with headquarters at Shimoga and the Chief Engineer in direct charge of the other four districts and the Special Divisions as heretofore. He will also be the Secretary to Government in the Department. The establishment proposed for the offices is sanctioned. Mr.K.R.Seshachar, Special Officer,Krishnaraja Sagara Works, will continue as Secretary to Government for the Works and in the Electrical Department. These arrangements will come into effect from 1st August 1926.

The Tank Survey Division will be abolished as proposed. Orders have already separately issued abolishing the special new establishment till now employed in the departments of Education and Military to carry out the building and other works of those departments. The work carried out by the establishments will hereafter be attended to by the Public Works Department. The extra cost of the new Circle of Superintendence of the Engineering Department which is estimated at Rs.18,090 will thus be reduced, the net financial result of the arrangements now sanctioned being as in the statement in the margin. Necessary action according to these orders may be taken immediately.

Extra cost of revised Establishment		Rs. 18,090.
Savings by abolition		
i of establishments in Education and Military Departments	Rs. 11,572.	
ii of Tank Survey Division (in 1926-27) approximately	" 2,500.	
Net extra expenditure in 1926-27		Rs. 4,018.
In future years		Rs. 6,518.

The Chief Engineer is requested to point out a source for meeting the net extra cost of Rs.4,018 during the current year and to investigate what further reductions of establishment can be effected in his office, and whether the existing arrangements for attending to architectural work can be modified so as to reduce expenditure and submit proposals early for orders of Government.

As according to the revised arrangements sanctioned in this order transfer of grant from one major head to another during the current year is involved, a supplementary schedule of demand should be placed before the Legislative Council for voting at the next session an extra grant to the Civil Works budget.

Secretariat work of the Public Works Department

Orders certain revised arrangements for the conduct of----

Read again:-

Government Order No.2534-85/C.B.157-23-1 dated the 4th February 1924, sanctioning certain administrative changes in the Public Works and Electrical Departments.

2. Note by the Chief Engineer on the subject of the Secretariat duties in connection with the Department of Public Works.

ORDER NO.358-409/C.B.19-26-1 DATED 28TH JULY 1926.

In the Government Order read above Government sanctioned the combination of the Irrigation Branch and the Roads and Buildings Branch of the Public Works Department, which till then were under separate officers, into one charge and placed the whole work under one Chief Engineer. This officer was given purely administrative work and the Secretariat functions of the Public Works Department together with those of the Electrical Department were assigned to a separate officer, viz., Mr.K.R.Seshachar, who is in addition Special Officer, Krishnarajasagara Works. Owing, however, to the necessity for starting the construction of the High Level Channel and on account of other developments on a large scale in connection with the Krishnaraja Sagara Works it is found necessary to have a full time Chief Engineer for the Krishnaraja Sagara Works. As Mr.K.R. Seshachar will, therefore, be unable hereafter to attend to Secretariat work of the Public Works Department, the Chief Engineer was requested to submit proposals for a re-allocation of the administrative and Secretariat work of the Department. That Officer has proposed the revival of the two circles of Superintending Engineers which were abolished in 1922, one officer at least being appointed for the present and placed in charge of the four districts of Hassan, Kadur, Shimoga and Chitaldrug, so as to relieve the Chief Engineer of part of his inspection work and enable him to take up the duties of the Secretary to Government in the Public Works Department. It has also been proposed in this connection that the Tank Survey Division may be abolished and the work transferred to the regular Public Work Divisions. Establishment as in the appended list has been proposed for the two administrative offices, viz., that of the Chief Engineer and the Superintending Engineer.

Government approve of the proposal to revive one Superintendence Circle in the Public Works Department in order that the Secretariat functions of the department may be transferred

to the Chief Engineer. The Superintending Engineer will be in charge of the four districts mentioned above with headquarters at Shimoga and the Chief Engineer in direct charge of the other four districts and the Special Divisions as heretofore. He will also be the Secretary to Government in the Department. The establishment proposed for the offices is sanctioned. Mr.K.R.Seshachar, Special Officer,Krishnaraja Sagara Works, will continue as Secretary to Government for the Works and in the Electrical Department. These arrangements will come into effect from 1st August 1926.

The Tank Survey Division will be abolished as proposed. Orders have already separately issued abolishing the special new establishment till now employed in the departments of Education and Military to carry out the building and other works of those departments. The work carried out by the establishments will hereafter be attended to by the Public Works Department. The extra cost of the new Circle of Superintendence of the Engineering Department which is estimated at Rs.18,090 will thus be reduced, the net financial result of the arrangements now sanctioned being as in the statement in the margin. Necessary action according to these orders may be taken immediately.

Extra cost of revised Establishment		Rs. 18,090.
Savings by abolition		
i of establishments in Education and Military Departments	Rs. 11,572.	
ii of Tank Survey Division (in 1926-27) approximately	" 2,500.	
Net extra expenditure in 1926-27		Rs. 4,018.
In future years		Rs. 6,518.

The Chief Engineer is requested to point out a source for meeting the net extra cost of Rs.4,018 during the current year and to investigate what further reductions of establishment can be effected in his office, and whether the existing arrangements for attending to architectural work can be modified so as to reduce expenditure and submit proposals early for orders of Government.

As according to the revised arrangements sanctioned in this order transfer of grant from one major head to another during the current year is involved, a supplementary schedule of demand should be placed before the Legislative Council for voting at the next session an extra grant to the Civil Works budget.

Government of His Highness the Maharaja of Mysore.

GENERAL AND REVENUE DEPARTMENTS

G. O. No. 358-409/C. B. 19-26-1 Dated, Bangalore, 28th July 1926.

Secretariat work of the Public Works Department

Orders certain revised arrangements for the conduct of——

Read again:-

Government Order No.2534-85/C.B.157-23-1 dated the 4th February 1924, sanctioning certain administrative changes in the Public Works and Electrical Departments.

2. Note by the Chief Engineer on the subject of the Secretariat duties in connection with the Department of Public Works.

ORDER NO.358-409/C.B.19-26-1 DATED 28TH JULY 1926.

In the Government Order read above Government sanctioned the combination of the Irrigation Branch and the Roads and Buildings Branch of the Public Works Department, which till then were under separate officers, into one charge and placed the whole work under one Chief Engineer. This officer was given purely administrative work and the Secretariat functions of the Public Works Department together with those of the Electrical Department were assigned to a separate officer, viz., Mr.K.R.Seshachar, who is in addition Special Officer, Krishnarajasagara Works. Owing, however, to the necessity for starting the construction of the High Level Channel and on account of other developments on a large scale in connection with the Krishnaraja Sagara Works it is found necessary to have a full time Chief Engineer for the Krishnaraja Sagara Works. As Mr.K.R.Seshachar will, therefore, be unable hereafter to attend to Secretariat work of the Public Works Department, the Chief Engineer was requested to submit proposals for a re-allocation of the administrative and Secretariat work of the Department. That Officer has proposed the revival of the two circles of Superintending Engineers which were abolished in 1922, one officer at least being appointed for the present and placed in charge of the four districts of Hassan, Kadur, Shimoga and Chitaldrug, so as to relieve the Chief Engineer of part of his inspection work and enable him to take up the duties of the Secretary to Government in the Public Works Department. It has also been proposed in this connection that the Tank Survey Division may be abolished and the work transferred to the regular Public Work Divisions. Establishment as in the appended list has been proposed for the two administrative offices, viz., that of the Chief Engineer and the Superintending Engineer.

Government approve of the proposal to revive one Superintendence Circle in the Public Works Department in order that the Secretariat functions of the department may be transferred

to the Chief Engineer. The Superintending Engineer will be in charge of the four districts mentioned above with headquarters at Shimoga and the Chief Engineer in direct charge of the other four districts and the Special Divisions as heretofore. He will also be the Secretary to Government in the Department. The establishment proposed for the offices is sanctioned. Mr.K.R.Seshachar, Special Officer, Krishnaraja Sagara Works, will continue as Secretary to Government for the Works and in the Electrical Department. These arrangements will come into effect from 1st August 1926.

The Tank Survey Division will be abolished as proposed. Orders have already separately issued abolishing the special new establishment till now employed in the departments of Education and Military to carry out the building and other works of those departments. The work carried out by the establishments will hereafter be attended to by the Public Works Department. The extra cost of the new Circle of Superintendence of the Engineering Department which is estimated at Rs.18,090 will thus be reduced, the net financial result of the arrangements now sanctioned being as in the statement in the margin. Necessary action according to these orders may be taken immediately.

Extra cost of revised Establishment	Rs. 18,090.
Savings by abolition	
i of establishments in Education and Military Departments	Rs. 11,572.
ii of Tank Survey Division (in 1926-27) approximately	" 2,500.
Net extra expenditure in 1926-27	Rs. 4,018.
In future years	Rs. 6,518.

The Chief Engineer is requested to point out a source for meeting the net extra cost of Rs.4,018 during the current year and to investigate what further reductions of establishment can be effected in his office, and whether the existing arrangements for attending to architectural work can be modified so as to reduce expenditure and submit proposals early for orders of Government.

As according to the revised arrangements sanctioned in this order transfer of grant from one major head to another during the current year is involved, a supplementary schedule of demand should be placed before the Legislative Council for voting at the next session an extra grant to the Civil Works budget.

P. G. D'SOUZA,
Chief Secretary to Government.

To—The Secretary to Government, Public Works Department.
The Comptroller, Mysore Government, through Finl. Sectt.
The Chief Engineer in Mysore.
The Special Officer, Krishnaraja Sagara Works.
The Heads of Departments.
The Secretaries to Government.
The Chief Electrical Engineer.

Budget Res. No. 10

Confidential

Immediate

No C. 150/1533.

Forwarded with Compts. to the Financial Secy with ref. to his No. F.d. 7082 dated 10th June 1926.

K. R. Seshachar
Secy to Govt.
Irrigation

Camp Mysore
15/6/1926

Submitted to Dewan

For perusal.
As decided in Council this morning, the P.W. Secy is requested to explain the position to the R.A. and oppose the Res. when it is moved. h (V.O.)
15-6-26.

Note on the proposal to [illegible] one of the Channels Divisions (The Upper or the Lower Channels Divisions) and to have only one Division in place of the two Divisions.

The length of the Channels which have to be looked after is 766 miles and lies in the districts of Kolar and Tumkur. Before the formation of the Channels Divisions, maintenance of the works and distribution of water were under two agencies, the former under the P.W. Department and the latter under the Revenue Department. The works were also being supervised by the P.W. Department and the Revenue Staff in the two Districts viz., Kolar and Hassan, the Archukurubhatte and Sri [illegible] left in the latter District and [illegible] Head Works and Channels upto [illegible] point being in the Kolar District. If the main requirin supervision been only distribution of water and [illegible] of channels it will be open [illegible] one Executive Engineer with a very large establishment to supervise. However, the arrangement of one Executive Engineer might have been [illegible] if there were not other responsible [illegible]

This question [illegible] settled

G. Lakshmi Rao
for Secy to Govt
Revenue

Notes of verification

The present cost of C. Engrs Office establishment is Rs 2184 1/3
Engineering Est is 2610 5/9
and that of the Secretariat is 623

(Rs 623 is half the cost of the Secretariat as the other half is charged to Electric Department)

Thus the present total cost is Rs 5418

The proposed cost of the Office of the C. Engr and Secretary is as below:—

Engineering Est. 2610
Office —do— 2385 1/12
Subrg: Engrs Office establishment including Engineering establishment 1910 1/6

Total proposed 6905

Diff. more per mt 1487

Total extra Cost per annum is 17844

Saving effected by the abolition of ——

Engineering ~~and~~ established in the Educational and Military Departments is taken as 10,500 in the draft by O.; while as per actuals worked out below it amounts to Rs 17,112. or 17100 in round sum:—

Military Departments

Budget 1926-27 page 159

Sub Overseers
$2(35-\frac{5}{2}-80) = 1920$

C. A. for 2 @ 15 = 360

Total A 2280

Education Department

Budget 1926-27 page 460

1) Engineering Staff (180+75) = 3060

2) Engineering Staff

Draftsmen 2(35)
Clerks (35)(25)
Peons (11)(10)
} 1812

3) Overseers 2 (100-10-150)
C.A (30)2 Rs 4874

3 contd

Draftsmen 2(30)	9960
Clerks 2(25)	
Surveyors 2(45+15)	
—do— 4(40+15)	
Peons ~~(8)~~ 4·8(10)	

Total B. 14832

Total A & B = 17112

Note

The large difference in savings is not susceptible of further verification unless it is known what portion of the above establishment is proposed to be retained in the Military and Education Departments

Tank Survey Dte

The savings taken to Account is for one Exy. Engineer (710 + DA 100) for 3 months = 2460 or

in round figure 2,500.

From para 3 of the draft G.O. it is seen that the Tank Survey Dte will be abolished as proposed, ~~but~~ retaining no establishment. On this assumption the savings will be

~~1163×3=~~

Dte Office 1163×3 mths = 3489

2 S. Dte Offices (1404×3) = 4212

Total. 7701

The portion of establishment attached to Tank Survey Dte which is to be retained is not known.
